

Payne Tan Stafford Award 2012

I was able to use the Payne Stafford Tan award towards the cost of attending the Society of Critical Care Medicine 2014 Annual Congress in San Francisco, USA.

This is one of the key meetings in critical care with over 4,000 delegates from around the world. I was able to listen to a number of important plenary lectures including Professor Peter Pronovost's 'From Heroism to Safe Design in the ICU', Professor Patrick Kochanek's 'Tackling Critical Care Brain Injury' and Professor Jean-Louis Vincent's 'Critical care Around the World: Global Challenges'. I was able to attend a wide variety of research presentations and lectures and network with a number of international colleagues, all of which has improved my understanding of critical care medicine. I am grateful to the RCOA and NIAA for this opportunity.
