

Quantifying the similarities between sedation and sleep

Dr. Sanders is grateful to the RCOA/NIAA Foundation Fund for supporting his travel to Madison, Wisconsin, USA and Liege, Belgium to meet with collaborators exploring the electroencephalographic and functional magnetic resonance imaging of sleep and sedation. Directly resulting from these meetings, collaborative research projects have been commenced and a review article has been published in *Anesthesiology*: Sanders RD, Tononi G, Laureys S, Sleigh JW. Unresponsiveness \neq Unconsciousness. *Anesthesiology*. 2012;116(4):946-59. We hope to publish further articles from our research projects in 2015. Dr. Sanders has now accepted an Assistant Professor position at the University of Wisconsin, Madison, USA.
